

Operations Management

Midwest Business Consulting understands the challenges facing businesses in today's highly competitive, global economy. Leaders must continually adapt business practices to keep their teams performing at ever increasing levels as customers demand that vendors outperform and often outbid competitors.

*Wrestling with poor performance?
Trust the experts at MBC to streamline your operations, eliminate waste and maximize productivity.*

We're experts at designing new operations, assessing existing operations for waste and vulnerabilities and implementing practical and cost-effective solutions to mitigate problems, neutralize threats and capitalize on opportunities. MBC specializes in:

Operations Management & Optimization:

Businesses which fail to keep operational plans current with growth, industry trends and customer needs will inevitably be forced to contend with diminishing margins, excessive rework, increased costs, dissatisfied clients and poor employee morale. MBC is well versed in helping companies of all sizes assess strengths and weaknesses in current operations and map out well-defined strategies to exploit opportunities and overcome weaknesses.

Maintenance Operations:

The benefits of an optimized maintenance programs are myriad and include reduced operating costs and system downtimes, optimized preventive maintenance schedules and inventories, efficient storage and retrieval of information to support management decisions and effective insulation from costly litigation.

Corporate Financial and Accounting Controls:

CEOs have fiduciary obligations to ensure proper financial controls are in place. From budgets and accounting practices to signature authority levels and funding requirements. MBC is experienced in drafting and implementing effective financial and accounting 'checks and balances' to provide senior management and boards with efficient oversight tools.

Whatever your operating needs, MBC can help!
