

## Aviation Management

*Midwest Business Consulting offers clients a unique and in-depth expertise that has propelled several airports and maintenance operations into the national spotlight as industry leaders.*

*With over 14 years' experience in the commercial-aviation sector, we understand the age-old adage, "If you've seen one airport... you've seen **one** airport" – our flexible approach ensures we develop the best solution to meet each client's exact needs.*

Midwest Business Consulting is pleased to offer unparalleled consulting services for a wide variety of commercial-aviation operations and projects.

As seasoned aviation professionals, we're highly adept at navigating projects of all sizes through the often complex environments present at many airports. A continuous spotlight on the proper initiation and planning of project goals, execution of scope and active monitoring and controlling of project objectives enables MBC to guarantee successful project outcomes time and again.

Our highly-skilled team has expertise managing a variety of commercial-aviation operations and projects including: airline consortiums, passenger assistance services, Ground Support Equipment (GSE) operations, new terminal and terminal renovation programs, as well as airport rates and charges modeling.

### **Equipment and Service Consortiums:**

During the past 15 years, more airlines and airports have looked to implement consortiums as means to drastically increase profits, improve equipment performance, mitigate legal exposure, create safer operating environments and improve passenger satisfaction. MBC has more than 12 years' experience managing all aspects of airline consortia, including; the development of business cases, formation, mobilization and day-to-day consortium management.

Whatever your needs – let MBC help get your operation off the ground.
