

## Environment and Accessibility

*As a component of their own commitment to social responsibility and the environment, many customers - among them government, municipalities and fortune 500 companies - are requiring sellers to maintain internal green initiatives and comply with ADA regulations.*

*Let the professionals at Midwest Business Consulting help determine what Social Responsibility means to your business.*

MBC is committed to minimizing the impact of business operations on the environment and strives to help clients create and maintain accessible facilities. Our highly-skilled team has expertise managing a variety of services, including:

### Sustainability Audit and Training

Let MBC's Green Team assist in a sustainability audit. We work closely with clients to balance corporate responsibility goals & budgets and minimize the environmental footprint of your operations.

### Leadership in Energy & Environmental Design

MBC maintains accredited LEED professionals on staff and regularly interacts with a network of USGBC Accredited LEED Green Associates and LEED APs as well as other experienced industry professionals to collaborate on client projects. Our goal is to minimize environmental impacts and mitigation expenses, educate clients and maximize the benefits of certification. MBC will be with you through each step of the certification process.

### ADA Compliance

Businesses, as well as state and local governments alike, are undertaking significant efforts to comply with the Americans with Disabilities Act of 1990. This means employers and Facility Managers must carefully consider all aspects of accessibility; from signage to TTY phones, access ramps, restroom accessibility, pet relief areas, water fountain heights, non-visual assistance cues and customer assistance programs.
