

Project Management

As a consulting firm with its 'roots' in project management, Midwest Business Consulting maintains a dedicated focus on the Project Management methodology.

Our approach maintains a spotlight on the proper initiation and planning of project goals, execution of scope and active monitoring and controlling of project objectives. Our tireless commitment to quality and client goals ensures Midwest Business Consulting is able to guarantee successful outcomes and client satisfaction time and again!

Our team of Project Management Professionals (PMP) are experienced in managing a wide variety of projects, including:

- Commercial Facilities Construction/ Rehab
- Building Systems Commissioning
- Heavy Equipment Procurement and Installation
- Space Repurposing / Office Moves
- Maintenance Programs Development
- Business Unit Mobilization & Strategy Deployment

MBC maintains a close-knit network of PMI Certified Project Management Professionals and Subject Matter Experts in various industries and business sectors to provide our clients with unrivaled agility that allows us to rapidly mobilize project teams to assist you on the most delicate of projects. Our PMs have experience managing projects ranging from \$30K to \$30M and operate in a variety of industries. We work closely with stakeholder groups to develop appropriate project strategies to ensure all Key Performance Indicators (KPIs) are met on time and on budget.

Our commitment to the Project Management discipline provides MBC clients with a consistent, well-defined and systematic approach to deconstructing and interpreting complex business issues. This in-depth understanding allows us to develop intricate strategies and deploy effective solutions that save time and money.

Whatever your business needs, trust MBC to serve as your project advisors.
