COMPANY OVERVIEW:

Midwest Business Consulting (MBC) offers professional project management, process improvement and business consulting services to clients of all sizes, across a variety of industries and business verticals. Our skilled team will integrate seamlessly with your construction project to augment your team and support your project goals. We work closely with key stakeholders to fully explore and define scopes and draft effective project plans to ensure desired outcomes are achieved to meet business goals. The result is quality projects delivered on scope, on schedule and within budget.

By building flexibility into our approach, we're able to recruit the best teams, integrate client-preferred vendors with the project, bring team members on at the appropriate project phase and disperse team segments when their respective services have been fulfilled. This flexibility allows us to remove overhead while retaining the best talent - the result is superior outcomes at the best possible cost.
